## Summary

Full stack development student focused on **Java**, with 1+ years of experience in building cool, useful and user-friendly applications. I want to specialize in **Java** and it's frameworks.

## Experience

### Autonomous Developer

February 2022 - Present

Junior Back-End Developer

Fortaleza, CE - Brazil

- I develop projects based on the courses I took, and my own projects. Currently learning Java and it's Frameworks.

### Agedata Soluções em Automação

February 2022 - July 2024

IT Support Technician

Fortaleza, CE.

- Responsible for providing remote and in-person support to customers, installing and maintaining systems, analysing causes of errors, assembling hardware and testing equipment.

## Education

### Centro Universitário Leonardo da Vinci - UNIASSELVI

February 2022 - Present

Graduation

IT - Analysis and systems development

## Projects

### Decodificador de Texto - Alura

It's a text encrypt application, it can completely transform the text you digit into something that you could only understand knowing the key to decrypt.

HTML, CSS, JavaScript

### Fantastic Animals

Origamid

It's a simple site showing some animals and their description, I recreated it from the Origamid platform, just to practice the technologies.

HTML, CSS, JavaScript

### Chess System built in Java

I'm building a chess system to be played on the console using coordinates, it'll be pretty cool.

Java
